REVIEW OF OPERATION

While the area under sugarcane cultivation registered an increase, the quantity of cane crushed increased only marginally due to difficulties in mobilizing cane-cutting labourers. The recovery percentage remained more or less at the same level as in the previous year. Compared to the previous year, the average realization from sugar increased marginally, however this increase was insufficient to offset the higher cost of sugarcane and other input materials consumed during the year. Production of industrial alcohol was slightly lower than in the previous year. Due to lower demand for power during the peak hours, the production and export of power was also lower as compared to the previous year.

SUGAR DIVISION

The quantum of sugarcane crushed at various units of the Company during the financial year 2025-26 is as under:

Name of the Unit	Cane crushed (in MT)
Sakthinagar	9,20,786
Sivaganga	3,25,313
Modakurichi	3,09,115

During the year under review, 1.23 lakh MT of sugar was produced by the Company as compared to 1.24 lakh MT in the previous year. Although there is improvement in the selling price of sugar, the revenue of sugar division has come down during the year under review as compared to the previous financial year.

DISTILLERY DIVISION

During the year under review, 243.62 lakh litres (previous year 245.43 lakh litres) of industrial alcohol was produced at Sakthinagar Distillery Unit.

**CO-GENERATION DIVISION**

The total power generated in the co-generation plants during the financial year was 2032.11 lakh units (previous year 2064.31 lakh units) out of which 1230.27 lakh units (previous year 1257 lakh units) of power was exported. The Company is selling the power through Indian Energy Exchange (IEX) as well as directly to third parties.

CURRENT FINANCIAL YEAR 2026-27

During the current financial year 2026-27, due to better availability of sugarcane, the cane crush is expected to be higher than last year subject to rainfall and other climatic conditions.

DEPOSITS

The Company has not accepted any deposit during the financial year under review. At the end of the financial year, there was no unclaimed deposit.

CORPORATE INFORMATION

During the year under review, the Company assigned its interest receivable from an erstwhile associate company to a third-party debt management company in full settlement.

The Company has made an application for One Time Settlement with respect to the SDF loan availed for the Sivaganga (Co-generation) unit, and the same is under consideration by the Central Government.

A B T Investments (India) Private Limited (ABTIPL) has transferred 1,68,60,000 equity shares of the Company to Dr.M.Manickam, Chairman and Managing Director by way of inter-se transfer on 4th May 2026. Consequent to the transfer of shares, the shareholding of ABTIPL in the Company has reduced from 55.93% to 41.75% of the paid-up equity share capital of the Company. ABTIPL has ceased to be Holding Company of the Company. Thereafter, the Company becomes an Associate Company of ABTIPL with effect from 4th May 2026.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

A. Industry Structure and Developments

The sugar industry is India's second-largest agro-based industry after cotton and plays a vital role in the rural economy by supporting the livelihoods of over 5 crore farmers and their dependents across approximately 55–60 lakh hectares under sugarcane cultivation. India is the world's largest consumer and one of the largest producers of sugar, with average annual sugarcane production of around 450 million tonnes, resulting in sugar production of approximately 32–34 million tonnes and domestic consumption of about 29 million tonnes. During the ongoing sugar season 2025–26, the industry recorded a 9% increase in sugar production, reaching 27.23 million tonnes as of March 31, 2026, compared with 24.88 million tonnes during the corresponding period of the previous year, reflecting the sector's continued resilience and strong production performance.

B. Opportunities and Threats

i. Opportunities

The Government of India's increasing focus on expanding the ethanol blending programme beyond the E20 roadmap through the proposed adoption of E85 fuel presents significant growth opportunities for the sugar and ethanol industry. As ethanol demand is expected to increase substantially over the long term, the expanded blending programme is likely to create additional demand, strengthen revenue diversification for sugar mills, and support the industry's sustainable growth.

ii. Threats

The industry continues to face risks from weather-related uncertainties, particularly in the south-western sugar belt, where sugarcane cultivation is highly dependent on monsoon rainfall. Declining sugarcane productivity, changing crop patterns, and the possibility of below-normal rainfall may adversely impact sugarcane availability and sugar production in the coming seasons.

C. Segmentwise or Productwise Performance

Segment wise results are given in the Notes on Financial Statements for the financial year ended 31.03.2026. Product wise performance is furnished in the Board's Report.

D. Outlook

The outlook for the Indian sugar industry remains stable, with gross sugar production for the 2026–27 season estimated at around 31 million tonnes. After diversion of sugar for ethanol production, net sugar output is expected to broadly match domestic consumption. However, the industry's performance will continue to depend on monsoon conditions, irrigation availability, and sugarcane productivity, as any significant shortfall in rainfall could impact sugar production in both the 2026–27 and 2027–28 seasons.

E. Risks and Concerns

The Indian sugar industry continues to face risks related to sugarcane availability and acreage. During the ongoing sugar season, sugarcane coverage stood at 54.08 lakh hectares, lower than the previous year's 58.84 lakh hectares, although it remains broadly in line with the five-year average. Any further decline in cultivation area, coupled with adverse weather conditions and lower crop yields, could affect sugarcane availability and sugar production in the coming seasons.

F. Internal Control Systems and their adequacy

The Company has an in-house internal audit team to ensure that all activities are monitored and controlled. Adequate internal checks are built-in to cover all monetary and material transactions in the system developed by the Company. The Internal Audit reports are presented to the Audit Committee on a quarterly basis for review and deliberation. The Management has assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2026 and found the same to be adequate and effective.

G. Financial Performance with respect to Operational Performance

The total revenue from operations for the financial year under review is Rs.89897.02 lakhs (previous year Rs.92854.06 lakhs). The financial year has ended with net profit of Rs.2813.45 lakhs (previous year net profit of Rs.7997.12 lakhs) after providing Rs.9841.53 lakhs (previous year Rs.10524.39 lakhs) for finance cost, Rs.3798.29 lakhs (previous year Rs.3710.11 lakhs) for depreciation and amortisation.

**H. Key Financial Ratios**

Details of significant changes in key financial ratios (i.e. change of 25% or more as compared to the immediately previous financial year) and in return on net worth and the reasons therefor are as under:

Description	Unit of measurement	2025-26	2024-25	Change (%)	Explanation
Interest coverage ratio	Times	1.77	1.40	26.43	The ratio improved primarily due to higher EBITDA and a reduction in interest cost during the year compared to the previous year.
Operating profit margin	%	15.19	11.86	28.08	The ratio increased mainly due to higher earnings before exceptional items, interest and tax during the year compared to the previous year.
Net Profit Margin	%	3.13	8.61	-63.65	The ratio decreased mainly due to lower profitability during the year compared to the previous year.
Return on Networth	%	13.18	50.52	-73.91	The ratio declined due to lower profit after tax during the year compared to the previous year, which had included exceptional income.

I. Material developments in Human Resource/Industrial Relations front, including number of people employed

The industrial relations at all plants and offices remain cordial. The total number of employees on the rolls of the Company, including temporary employees and apprentice, was 1264 as at the financial year ended on 31st March 2026. Training programmes are conducted depending on the needs for updating the knowledge with respect to the developments in the industry.

INDEPENDENT AUDITOR'S REPORT

To The Members of Sakthi Sugars Limited

Report on the Audit of the Financial Statements

Opinion

1. We have audited the accompanying financial statements of Sakthi Sugars Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2026, and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flows for the year then ended and notes to the financial statements, including a summary of material accounting policies and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2026, the profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

4. We draw attention to Note 42.14 to the financial statements, wherein it is stated that the Hon'ble Appellate Tribunal for Electricity (APTEL), vide its judgement dated December 22, 2025, upheld the Company's entitlement to additional tariff and carrying cost in respect of tariff revision for its co-generation units. In view of the enforceable rights arising from the said judgement and consistent with the accrual basis of accounting, the Company has recognized, based on a reasonable and reliable estimate, differential tariff income of Rs. 4,410.64 lakhs under Revenue from Operations and carrying cost of Rs. 3,800.47 lakhs under Other Income for the year ended March 31, 2026, resulting in aggregate income recognition of Rs. 8,211.11 lakhs. The APTEL has, however, remanded the matter to the Tamil Nadu Electricity Regulatory Commission (TNERC) for passing consequential orders, and accordingly the actual amounts recoverable remain subject to determination. Any difference arising upon issuance of the TNERC order will be adjusted as a change in accounting estimate in the period in which such order is passed. Our opinion is not modified in respect of this matter.

Key Audit Matters

5. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matter to be communicated in our report.

Key Audit Matter	How the matter was addressed in the audit
(A) Valuation of inventories [Refer to Note 1.9 and Note 9 to the Financial Statements] As at March 31, 2026, the Company held inventories of Rs. 12,112.23 lakhs. Valuation involves management estimates regarding seasonal cost determination, allocation to by-products, and assessment of net realisable value (NRV). Due to the significance of the balance and the judgements involved, this was considered a key audit matter	Our audit procedures primarily included: (a) Understanding the accounting policies and processes relating to inventory valuation and the treatment of by-products; (b) Considering the basis adopted for determination of inventory cost, including the relevant production and cost information; (c) Considering the basis adopted for determination of NRV with reference to relevant supporting information; and (d) Evaluating the related presentation and disclosures in the financial statements. Based on the audit procedures performed and the information considered, the valuation of inventories and the related disclosures in the financial statements were considered reasonable

**(B) Assessment of litigations and related disclosure of contingent liabilities**

[Refer to Note 1.3 and Note 41A to the Financial Statements]

As at March 31, 2026, the Company had various pending litigations and claims.

The assessment of these matters involves management judgement in determining the possible outcomes and the related accounting and disclosure requirements. Considering the nature and significance of the matters involved and the judgement required in their assessment, this matter was considered to be a key audit matter.

Our audit procedures primarily included:

- (a) Understanding the processes followed by the Company for identification and assessment of litigations and claims;
- (b) Considering the status and developments relating to significant matters and the information and explanations provided by management;
- (c) Considering relevant supporting information in relation to significant litigations and the amounts disclosed as contingent liabilities; and
- (d) Assessing the adequacy of disclosures in the financial statements.

Based on the audit procedures performed and the information considered, management's assessment of litigations and the related contingent liability disclosures were considered appropriate.

(C) Valuation of unquoted investments

[Refer Note 5 and Note 50.4 to the Financial Statements]

As at March 31, 2026, the Company held significant investments in unquoted equity instruments measured at fair value through profit or loss (Level 3).

Valuation of unquoted investments requires management estimates and assumptions regarding valuation inputs and methodologies. Due to the materiality and subjectivity involved, this was considered a key audit matter.

Our audit procedures primarily included:

- (a) Understanding the process followed for determining the fair values of the unquoted equity investments;
- (b) Considering the valuation methodology and key information used in determining the fair values;

Other Information

6. The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's Annual Report, but does not include the financial statements and our auditor's report thereon.
7. The other information is expected to be made available to us after the date of this auditor's report. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
8. In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and in doing so, consider whether the other information is materially inconsistent with the Financial Statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.
9. When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take necessary actions, as applicable under the relevant laws and regulations.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

10. The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate

internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

11. In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
12. The Company's Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

13. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
14. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:
 - (a) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
 - (b) Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
 - (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
 - (d) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
 - (e) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
15. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
16. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
17. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure - B to the Independent Auditor's Report

Referred to in paragraph 20(f) of the Independent Auditor's Report of even date to the members of **Sakthi Sugars Limited** on the financial statements for the year ended March 31, 2026

Report on the Internal Financial Controls with reference to Financial Statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

1. We have audited the internal financial controls with reference to financial statements of Sakthi Sugars Limited ("the Company") as at March 31, 2026 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls with reference to the financial statements based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

**Auditor's Responsibility**

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to the financial statements.

Meaning of Internal Financial Controls with reference to the Financial Statements

6. A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that:
 - (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
 - (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
 - (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to the financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to the financial statements to future periods are subject to the risk that the internal financial control with reference to the financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to the financial statements and such internal financial controls with reference to the financial statements were operating effectively as at March 31, 2026, based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1. MATERIAL ACCOUNTING POLICIES

The material accounting policies applied by the Company in the preparation of these financial statements are set out below. These policies have been applied consistently to all periods presented in the financial statements, unless stated otherwise.

1.1 Basis of Preparation and Presentation:

These financial statements are the separate financial statements of the Company prepared in accordance with Indian Accounting Standards ("Ind AS") as prescribed under Section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules, 2015 and other provisions of the Companies Act, 2013 as amended from time to time.

These financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting except for certain financial assets and financial liabilities that are measured at fair values at the end of each reporting period, as stated in the accounting policies set out below. The accounting policies have been applied consistently over all the periods presented in these financial statements.

The financial statements are presented in Indian Rupees which is the functional currency and presentation currency of the Company and all values are rounded to the nearest Lakhs, except where otherwise indicated.

1.2 Current/Non-Current Classification:

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

(a) An asset is treated as current when it is:

- (i) Expected to be realised or intended to be sold or consumed in normal operating cycle.
 - (ii) Expected to be realised within twelve months after the reporting period, or
 - (iii) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.
 - (iv) Held primarily for the purpose of trading.
- All other assets are classified as non-current.

(b) A liability is current when:

- (i) It is expected to be settled in normal operating cycle.
- (ii) It is due to be settled within twelve months after the reporting period;
- (iii) The Company does not have a substantive right to defer settlement of the liability for at least twelve months after the reporting period; or
- (iv) It is held primarily for the purpose of trading.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities..

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

1.3 Use of Estimates and Judgements

The preparation of the financial statements in conformity with Ind AS requires the Management to make judgements, estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) as of the date of the financial statements and the reported income and expenses like provision for employee benefits, provision for doubtful trade receivables/advances/contingencies, provision for warranties, allowance for slow/non-moving inventories, useful life

of Property, Plant and Equipment, provision for taxation, etc., during the reporting year. The Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results may vary from these estimates.

The estimates and judgements used in the preparation of the financial statements are continuously evaluated by the Company and are based on historical experience and various other assumptions and factors (including expectations of future events) that the Company believes to be reasonable under the existing circumstances. Differences between actual results and estimates are recognised in the period in which the results are known/materialised.

The said estimates are based on the facts and events, that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

1.4 Property, Plant and Equipment

Measurement at recognition: Property, Plant and Equipment assets are carried at cost net of tax / duty credit availed less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the items.

Historical cost includes taxes, duties, freight, insurance etc., attributable to acquisition and installation of assets and borrowing cost incurred upto the date of commencing operations but excludes duties and taxes that are recoverable from taxing authorities. Indirect expenses during construction period, which are required to bring the asset in the condition for its intended use by the management and are directly attributable to bringing the asset to its position, are also capitalised.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Assets which are not ready for their intended use and Capital work-in-progress are carried at cost comprising direct cost, related incidental expenses and attributable interest. Advances given towards acquisition of property, plant and equipment outstanding at each balance sheet date are disclosed as capital advance under other non-current assets.

Depreciation: Depreciation on Property, Plant and Equipment is provided on the straight-line method over the useful life in the manner prescribed in the Schedule II of the Companies Act 2013.

Depreciation on addition to assets or on sale/discardment of assets, is calculated on pro-rata from the month of such addition or up to the month of such sale/discarding, as the case may be.

De-recognition: An item of Property, Plant and Equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset.

Gains and losses on disposals or retirement of assets are determined by comparing proceeds with carrying amount. These are recognised in the Statement of Profit and Loss.

1.5 Intangible assets:

Measurement at recognition: Intangible assets acquired separately are measured on initial recognition at cost. Intangible assets arising on acquisition of business are measured at fair value as at date of acquisition. Internally generated intangibles including research cost are not capitalized and the related expenditure is recognized in the Statement of Profit and Loss in the period in which the expenditure is incurred. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment loss, if any.

Amortization: Intangible Assets with finite lives are amortized on a Straight-Line basis over the estimated useful economic life. The amortization expense on intangible assets with finite lives is recognized in the Statement of Profit and Loss. The amortization period and the amortization method for an intangible asset with finite useful life is reviewed at the end of each financial year. If any of these expectations differ from previous estimates, such change is accounted for as a change in an accounting estimate.

De-recognition: The carrying amount of an intangible asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the De-recognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the intangible asset and is recognized in the Statement of Profit and Loss when the asset is derecognized.

1.6 Impairment of Assets:

Assets that are subject to depreciation and amortisation and assets representing investments in subsidiary and associate companies are reviewed for impairment, whenever events or changes in circumstances indicate that carrying amount may not be recoverable. Such circumstances include, though are not limited to, significant or sustained decline in revenues or earnings and material adverse changes in the economic environment.

The carrying values of assets/cash generating units are reviewed to determine whether there is any indication of impairment of the carrying amount of the Company's assets. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of the asset exceeds the recoverable amount. The recoverable amount is the higher of fair value less costs of disposal and value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased such reversal of impairment loss is recognised in the Statement of Profit and Loss. Impairment losses on assets are reversed in the Statement of Profit and Loss only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognised.

1.7 Revenue Recognition:

Revenue from contracts with customers is recognized on transfer of control of promised goods or services to a customer at an amount that reflects the consideration to which the Company is expected to be entitled to in exchange for those goods or services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold, and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract. This variable consideration is estimated based on the expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

a) Sale of goods:

Revenue is recognised when the performance obligations are satisfied and the control of the product is transferred, being when the goods are delivered as per the relevant terms of the contract at which point in time the Company has a right to payment for the asset, customer has legal title of the asset, customer bears significant risk and rewards of ownership and the customer has accepted the asset or the Company has objective evidence that all criteria for acceptance have been satisfied. Payment for the sale is made as per the credit terms in the agreements with the customers. The credit period is generally short term, thus there is no significant financing component.

Revenue is measured based on the transaction price, which is the consideration, net of customer incentives, discounts, variable considerations, payments made to customers, other similar charges, as specified in the contract with the customer. Additionally, revenue excludes taxes collected from customers, which are subsequently remitted to governmental authorities.

b) Dividend and interest income:

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

c) Insurance Claims:

Insurance claims are accounted for on the basis of claims admitted/ expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

d) Export Benefits:

Export benefits are accounted for in the year of exports based on eligibility and when there is no uncertainty in receiving the same.

e) Rental Income:

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature.

f) Revenue arising from Regulatory Tariff Revisions and Supplementary Claims

Revenue arising from tariff revisions, regulatory adjudications or supplementary claims is recognised when enforceable rights are established and it is highly probable that a significant reversal will not occur.

g) Other Incomes and Expenses:

All other income and expenses are accounted for on accrual basis.

**1.8 Foreign Currency Transactions:**

On initial recognition, transactions in foreign currencies entered into by the Company are recorded in the functional currency (i.e. Indian Rupees), by applying to the foreign currency amount, the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. Exchange differences arising on foreign exchange transactions settled during the year are recognized in the Statement of Profit and Loss.

Foreign currency monetary items of the Company are translated at the closing exchange rates. Non-monetary items that are measured at historical cost in a foreign currency, are translated using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency, are translated using the exchange rates at the date when the fair value is measured.

Exchange differences arising out of these translations are recognized in the Statement of Profit and Loss.

1.9 Inventory

Inventories excluding by-products and scraps are valued at the lower of cost or net realizable value.

Cost of inventory comprises of the purchase price, cost of conversion and other directly attributable costs that have been incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price in the ordinary course of business, less all estimated costs of completion and costs necessary to make the sale.

The cost of inventories of stores, spares and soya products is computed on weighted average basis. Cost of sugar inventory is determined on a seasonal weighted average basis considering the seasonal nature of operations.

The cost of inventories of Soya Bean and Stock-in-trade of fertilizer is computed on FIFO basis.

By-products and scraps are valued at Net realizable value.

1.10 Biological Assets

Biological assets comprise of living animals and Standing crops (crops under development) of sugarcane.

a) Living Animals

Livestock are measured at fair value less cost to sell. Costs to sell include the transportation charges for transporting the cattle to the market but excludes finance costs and income taxes. Changes in fair value of livestock are recognised in the statement of profit and loss. Costs such as vaccination, fodder and other expenses are expensed as incurred. The animals reared from conception (calf) and heifers are classified as 'immatured biological assets' until the animals become productive. All the productive animals are classified as "matured biological assets".

b) Standing Crops

The biological process starts with preparation of land for planting, seedlings and ends with the harvesting of crops.

Biological assets are measured at fair value less costs to sell, except where fair value cannot be measured reliably, in which case they are measured at cost.

In respect of Standing crop, where little biological transformation has taken place since the initial cost was incurred before the balance sheet date, such biological assets are measured at cost i.e., expenses incurred on such plantation upto the balance sheet date. When harvested, crop is transferred to inventory at fair value less costs to sell.

Changes in fair value of biological assets is recognised in the statement of profit and loss.

1.11 Employee Benefits:**a) Short term employee benefits:**

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits and they are recognized in the period in which the employee renders the related service. The Company recognizes the undiscounted amount of short-term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

b) Post-employment benefits:**i) Defined contribution plans:**

Defined contribution plans are Employee Provident Fund, Employee State Insurance Scheme for all applicable employees and Superannuation Scheme for eligible employees.

Recognition and measurement of defined contribution plans:

The Company recognizes contribution payable to a defined contribution plan as an expense in the Statement of Profit and Loss when the employees render services to the Company during the reporting period. If the contribution payable for services received from employees before the reporting date exceeds the contributions already paid, the deficit payable is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the reporting date, the excess is recognized as an asset to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund.

**ii) Defined benefit plans:**

Gratuity: Liabilities with regard to the gratuity benefits payable in future are determined by actuarial valuation at each Balance Sheet date. Actuarial gains and losses arising from changes in actuarial assumptions are recognized in other comprehensive income and shall not be reclassified to the Statement of Profit and Loss in a subsequent period.

Leave encashment / Compensated absences: The Company provides for the encashment of leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment / availment. The liability is provided based on the number of days of unutilized leave at each Balance Sheet date on the basis of an independent actuarial valuation.

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

1.12 Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker ('CODM') of the Company. The CODM is responsible for allocating resources and assessing performance of the operating segments of the Company.

1.13 Non-Current Assets held for sale:

The Company classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use of the assets and actions required to complete such sale indicate that it is unlikely that significant changes to the plan to sell will be made or that the decision to sell will be withdrawn. Also, such assets are classified as held for sale only if the management expects to complete the sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and the fair value less cost to sell. Non-current assets are not depreciated or amortized while they are classified as held for sale.

Non-current assets classified as held for sale are presented separately from the other assets in the balance sheet.

1.14 Government Grants

Government grants are not recognised until there is reasonable assurance that the company will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in Statement of Profit and Loss on a systematic basis over the periods in which the company recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the company should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the balance sheet and transferred to Statement of Profit and Loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the company with no future related costs are recognised in Statement of Profit and Loss in the period in which they become receivable.

1.15 Income Taxes

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Current and deferred tax are recognized as income or an expense in the Statement of Profit and Loss, except when they relate to items that are recognized in other comprehensive income, in which case, the current and deferred tax income/expense are recognized in other comprehensive income or directly in equity, respectively.

Current Tax:

The current income tax charge is calculated on taxable profits for the year chargeable to tax on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate based on amounts expected to be paid to the tax authorities.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis.

As per the Company's assessment on uncertainty over tax treatment on recognising Income Tax with respect to Appendix C to Ind AS 12, there are no material uncertainties over tax treatments.

Deferred Tax:

Deferred income tax is provided in full, using the Balance Sheet method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised, or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the same can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company offsets deferred tax assets and deferred tax liabilities, where it has a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

1.16 Financial Instrument

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through Statement of Profit and Loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through Profit and Loss are recognised immediately in Statement of Profit and Loss.

a) Fair Value Measurement

The Company measures financial instruments, such as, investments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (i) In the principal market for the asset or liability, or
- (ii) In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- (i) Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- (ii) Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

- (iii) Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques, including the discounted cash flow model, which involve various judgements and assumptions.

b) Financial Assets

i) Initial recognition and measurement

At initial recognition, the Company measures a financial asset, except trade receivable at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Trade receivables are initially measured at transaction price. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the statement of Profit and Loss.

ii) Subsequent measurement

Subsequent measurement of financial assets depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its financial assets into the following categories:

Amortised cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through Other Comprehensive Income (FVOCI):

Assets that are held for collection of contractual cash flows and for sale of financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through Other Comprehensive Income (OCI), except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in Statement of Profit and Loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair Value through Profit or Loss (FVTPL):

Financial assets are classified and measured at fair value through profit or loss (FVTPL) if they do not meet the criteria for amortised cost or FVOCI due to the business model, the nature of contractual cash flows not being solely payments of principal and interest (SPPI), or if the Company has irrevocably elected to designate them at FVTPL. These assets are subsequently measured at fair value, with all changes, including interest income and gains or losses, recognised in the Statement of Profit and Loss.

iii) De-recognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised primarily when:

- (a) The rights to receive cash flows from the asset have expired, or
- (b) The Company has transferred substantially all the risks and rewards of the asset.

iv) Impairment of Financial Assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the financial assets and credit risk exposure that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance.

The Company follows simplified approach for recognition of impairment loss allowance on Trade receivables. The Company recognises impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss. The Balance Sheet presentation for various financial instruments is that in the case of financial assets measured as at amortised cost, ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the Balance Sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the group does not reduce impairment allowance from the gross carrying amount.

c) Financial Liabilities

i) Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables.

ii) Subsequent measurement

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method.

Financial liabilities designated upon initial recognition at Fair Value Through Profit or Loss (FVTPL) are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains / losses attributable to changes in own credit risks are recognized in OCI. These gains/ losses are not subsequently transferred to Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the Statement of Profit and Loss.

Financial liabilities that are not held-for-trading and are not designated as at fair value through profit or loss are measured at amortised cost at the end of the subsequent accounting period. The carrying amount of financial liabilities that are subsequently measured at amortised cost are determined based on the Effective Interest Rate method. Interest expense that is not capitalised as part of costs of an asset is included in the "Finance costs" in Statement of Profit and Loss.

iii) De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

1.17 Leases:

a) Company as Lessee:

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset; (ii) the Company has the right to obtain substantially all of the economic benefits from use of the asset through the period of use; and (iii) the Company has the right to direct the use of the asset.

As a lessee, the Company recognises a right-of-use (ROU) asset and a lease liability at the lease commencement date. The ROU asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The ROU asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the ROU asset or the end of the lease term; provided that where the lease transfers ownership of the underlying asset to the Company by the end of the lease term, or where the cost of the ROU asset reflects that the Company will exercise a purchase option, the ROU asset is depreciated over the useful life of the underlying asset. In addition, the ROU asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method, with the interest accretion recognised as a finance cost in the Statement of Profit and Loss. Lease liabilities are remeasured, with a corresponding adjustment to the related ROU asset, upon reassessment of the exercise of extension, termination or purchase options, upon changes in future lease payments resulting from a change in an index or rate, upon changes in amounts expected to be payable under residual value guarantees, and upon lease modifications not accounted for as a separate lease.

The Company has used a number of practical expedients when applying Ind AS 116. The Company has elected not to recognise ROU assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments relating to these leases as an expense on a straight-line basis over the lease term. The Company applied a single discount rate to a portfolio of leases with reasonably similar characteristics.

The Company's lease asset classes primarily consist of leases for land and building for offices, and vehicles.

The ROU assets and lease liabilities have been separately presented in the Balance Sheet. The principal portion of lease payments and interest on lease liabilities are classified as financing cash flows, while lease payments relating to short-term leases and leases of low-value assets are classified as operating cash flows, in the Statement of Cash Flows.

b) Company as Lessor:

The Company's significant leasing arrangements are in respect of operating leases for premises that are cancellable in nature. The lease rentals under such agreements are recognised in the Statement of Profit and Loss as per the terms of the lease. Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

1.18 Provisions and Contingencies

The Company recognizes provisions when a present obligation (legal or constructive) as a result of a past event exists and it is probable that an outflow of resources embodying economic benefits will be required to settle such obligation and the amount of such obligation can be reliably estimated.

If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is probable that an outflow of resources will not be required to settle the obligation. However, if the possibility of outflow of resources, arising out of present obligation, is remote, it is not even disclosed as contingent liability.

A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the notes to financial statements. A contingent asset is not recognized in financial statements, however, the same is disclosed where an inflow of economic benefit is probable.

The Company exercises judgement in measuring and recognising provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, mediation, arbitration or government regulation, as well as other contingent liabilities. Judgement is necessary in assessing the likelihood that a pending claim will succeed, or a liability will arise, and to quantify the possible range of the financial settlement. Because of the inherent uncertainty in this evaluation process, actual losses may be different from the originally estimated provision.

1.19 Borrowing Costs

Borrowing cost includes interest, amortisation of ancillary cost incurred in connection with the arrangement of borrowings and the exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

**1.20. Exceptional Items**

An item of income or expense which by its size, type or incidence requires disclosure in order to improve an understanding of the performance of the Company is treated as an exceptional item and disclosed as such in the financial statements.

Exceptional items are disclosed separately in the financial statements where it is necessary to do so to provide further understanding of the financial performance of the Company. These are material items of income or expense that have to be shown separately due to their nature or incidence.

1.21. Events after Reporting date

Where events occurring after the Balance Sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the Balance Sheet date of material size or nature are only disclosed.

1.22. Cash and Cash Equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand, demand deposits with Banks, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, demand deposits with banks, short-term balances (with an original maturity of three months or less from date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

1.23. Statement of Cash Flows

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

1.24. Recent Accounting Pronouncements

The Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under the Companies (Indian Accounting Standards) Rules, as issued from time to time

a. Amendments notified and applicable from April 1, 2025:

During the year ended March 31, 2026, the MCA notified amendments to the Indian Accounting Standards applicable for annual reporting periods beginning on or after April 1, 2025, relating to Ind AS 21 – The Effects of Changes in Foreign Exchange Rates (Lack of Exchangeability), Ind AS 1 – Presentation of Financial Statements (Classification of Liabilities as Current or Non-current, including rights to defer settlement and covenants, to the extent applicable from April 1, 2025), Ind AS 7 – Statement of Cash Flows and Ind AS 107 – Financial Instruments: Disclosures (Supplier Finance Arrangements), and Ind AS 12 – Income Taxes (International Tax Reform – Pillar Two Model Rules). The Company has evaluated the applicability of these amendments and their impact on the financial statements. The application of the amendments, to the extent applicable to the Company, did not have any material impact on the financial statements of the Company.

b. Amendments issued but not yet effective:

Certain provisions of the amendments to Ind AS 1 – Presentation of Financial Statements relating to liabilities with covenants and the consequential amendment to Ind AS 10 – Events after the Reporting Period, notified by the MCA vide the Companies (Indian Accounting Standards) Second Amendment Rules, 2025, are applicable for annual reporting periods beginning on or after April 1, 2026. The Company has reviewed the aforesaid amendments and, based on its preliminary evaluation, does not expect any material impact on the financial statements upon their application.

The Company has invested the plan assets with insurer-managed funds. The insurance company has invested the plan assets in Government Securities, Debt Funds, Equity Shares, Mutual Funds, Money Market Instruments and Time Deposits. The expected rate of return on plan assets is based on the expectation of the average long-term rate of return expected on investments of the fund during the estimated term of the obligation.

The Company has purchased an insurance policy which is essentially a year-on-year cash accumulation plan in which the interest rate is declared annually and is guaranteed for a period of one year. The insurance company, as part of the policy terms, makes payment of gratuity outgoes during the year, subject to sufficiency of funds under the policy. The policy thus mitigates the liquidity risk. However, as the duration of assets is shorter than the duration of liabilities, the Company is exposed to movements in interest rates, particularly a significant fall in interest rates, which may result in an increase in the liability without a corresponding increase in the assets.

The Company is exposed to various risks in providing the gratuity benefit, including salary escalation risk, interest rate risk, investment risk and demographic risk.

The weighted average duration of the defined benefit obligation is 10 years (Previous year: 10 years).

The expected benefits/payouts are based on the same assumptions used to measure the Company's benefit obligations as at March 31, 2026.

Expected contribution to the plan in the next financial year ending March 31, 2027 is Rs.84.19 Lakhs (Rs. 220.58 Lakhs).

50.4 Fair Value Measurements

The following table provides the fair value measurement hierarchy of the Company's Financial Assets and Liabilities:

50.4.1 Quoted prices in an active market (Level 1)

This level of hierarchy includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities. This category consists of investment in quoted equity shares, and mutual fund investments.

50.4.2 Valuation techniques with observable inputs (Level 2)

This level of hierarchy includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This level of hierarchy includes Company's over-the-counter (OTC) derivative contracts.

50.4.3 Valuation techniques with significant unobservable inputs (Level 3)

Valuation techniques with significant unobservable inputs (Level 3): This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

50.4.7 Financial Instrument measured at Amortised Cost

The carrying amount of financial assets and financial liabilities measured at amortised cost in the financial statements are a reasonable approximation of their fair values since the Company does not anticipate that the carrying amounts would be significantly different from the values that would eventually be received or settled.

50.5 Financial Risk Management Objectives

The Company's Corporate finance department provides services to business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyse the exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Company seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies approved by the Board of Directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the Management and the internal auditors on a continuous basis. The Company does not enter into or trade financial instruments, including derivatives for speculative purposes.

The Corporate Treasury function reports quarterly to the Company's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.

50.5.1 Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk includes borrowings, investments, trade payables, trade receivables, loans and derivative financial instruments.

50.5.2 Foreign Currency Exchange Rate Risk

The fluctuation in foreign currency exchange rates may have potential impact on the income statement and equity, where any transaction references more than one currency. The Company evaluates the impact of foreign exchange rate fluctuations by assessing its exposure to exchange rate risks.

50.5.3 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

50.5.4 Credit risk management

The Company does not have significant credit risk exposure to any single counterparty.
