MANAGEMENT DISCUSSION AND ANALYSIS REPORT

An Overview

The Company's total sugarcane crushing capacity is 19,000 TCD with three sugar mills in the State of Tamilnadu at Sakthinagar, Erode District with a capacity of 9,000 TCD, Modakkurichi, Erode District with a capacity of 3,500 TCD and at Padamathur, Sivaganga District with a capacity of 4,000 TCD and a sugar mill at Dhenkanal in the state of Orissa with a crushing capacity of 2,500 TCD.

The Company has set up three cogeneration power plants alongside its sugar units in Tamil Nadu at Sakthinagar, Modakkurichi and Sivaganga with an aggregate power generation capacity of 92 MW per hour. Another cogeneration plant of 25 MW per hour capacity is under implementation at Sakthinagar.

The Company has two Distillery units, one at Sakthinagar with 36,000 KL per annum and the other at Dhenkanal with 10,000 KL per annum.

The Company has an integrated Soya complex with a capacity to process 90,000 TPA of Soyabean at Pollachi.

Performance during the year under review

During the year under review, the total cane crushing was 29.01 lakh MT with an average sugar recovery of 9.60%. The Company has sold 28.25 lakh Qtls. of sugar valued at Rs.771.75 crores. In Distillery Division, 402.19 lakh Litres of Industrial Alcohol was produced for the year ended 31st March 2012. In the cogeneration plant 3393.77 lakh units of power was generated of which 2244.17 Lakh units of power was exported to the State grid of Tamilnadu Electricity Board and to third parties.

Industry Structure and Developments

It is estimated that India will produce 26 million tonnes of sugar in 2012-13 compared with 24.3 million tonnes last year. The domestic demand is projected to be 22 million tonnes. For the 2012-13 season, plantation of sugarcane is nearing its end and 46.4 lakh hectares of land have been covered so far compared with 44 lakh hectares covered in the same period last year.

The increasing area under sugarcane will lead to surplus sugar output in 2012-13. For the past three consecutive years, the country has registered surplus in sugar output. Considering the domestic consumption of over 22 million tonnes, India may retain its position as net exporter.

The Central Government's decision to allow export of sugar under Open General Licence will help sugar industry in finding an avenue to sell the excess production of sugar and to have stability in the sugar price in the domestic market.

Opportunities

The Government recently freed up sugar exports by lifting the quantitative restrictions which will have favourable impact on the sugar price in the domestic market.

Increased volume of sugarcane production will result in higher production of sugar besides higher volume of molasses and bagasse. This will also facilitate increased production of industrial alcohol and generation of additional power in the cogeneration units.

Threats

Increase in production of sugar and alcohol will have negative impact on the selling price of these products. Export of sugar from India may bring down the price of sugar in the global market.

Segmentwise and Productwise Performance

Segmentwise results are given in the accounts for the year ended 31.3.2012. Productwise performance is furnished in the Report of the Directors.

Financial Performance with respect to Operational Performance
